

Posters

- P-1 Coherent Vibrations in Single-Walled Carbon Nanotubes**
Keiko Kato, Kunie Ishioka, Masahiro Kitajima, Jie Tang, Hrvoje Petek*
National Institute for Materials Science, Japan
* *University of Pittsburgh, USA*
- P-2 XUV pump- IR probe experiments on molecular Hydrogen**
G. J. Waters¹, C. J. D. Freeman¹, J. D. Steele-Davies¹, M. J. Stankiewicz¹, J. S. Robinson², C. Arrell², J. P. Marangos², J. W. G. Tisch² and L. J. Frasinski¹
¹*J. J. Thompson Physical Laboratory, University of Reading, UK*
²*Blackett Laboratory, Imperial College London, UK*
- P-3 Time-Resolved Visualization of vibrational wave packets evolving on multi-dimensional reaction potential in poly-atomic molecules**
H. Yazawa¹, Y. Esumi¹, F. Kannari¹, R. Itakura^{2,3}, K. Yamanouchi³
¹*Department of Electronics and Electrical Engineering, Keio University, Japan*
²*Kansai Photon Science Institute, Japan Atomic Energy Agency, Japan*
³*Department of Chemistry, School of Science, The University of Tokyo, Japan*
- P-4 X-ray Pulse Emission from Fs-laser-irradiated Aqueous Solution Flow Supported by a Metal Plate and Its Application**
Koji Hatanaka,¹ Shinichi Matsushima,² Hiroshi Fukumura²
Research Institute for Electronic Science, Hokkaido University, Japan¹
Department of Chemistry, Graduate School of Science, Tohoku University, Japan²
- P-5 Ultrafast hydrogen migration in methyl amine in intense laser fields**
Tomoya Okino, Takayuki Ichikawa, Ryuji Itakura, Kaoru Yamanouchi
Department of Chemistry, School of Science The University of Tokyo, Japan
- P-6 Design of a Compressor for Attosecond Pulses in the Extreme-Ultraviolet**
Luca Poletto, Fabio Frassetto and Paolo Villorresi
Laboratory of Ultraviolet and X-ray Optical Research, CNR-INFM, DEI – University of Padova, Italy
- P-7 Generation of intense ultrafast XUV pulses from high-harmonics and selected by a compensated monochromator**
L. Poletto¹, M. Longhin¹, P. Villorresi¹, E. Benedetti², F. Ferrari², G. Sansone², S. Stagira², M. Nisoli²
¹*Laboratory of Ultraviolet and X-ray Optical Research, CNR-INFM, DEI – University of Padova, Italy*
²*National Laboratory for Ultrafast and Ultraintense Optical Science, CNR-INFM, Department of Physics, Politecnico di Milano, Italy*
- P-8 Chalcogenide semiconductors modified by fs-laser radiation: inside view**
Alina Manshina, Alexander Shimko, Gaetano Ferrante*
Laser Research Institute, St.Petersburg State University, Russia
**Department of Physics and Related Technologies, University of Palermo, Italy*
- P-9 Multiple Ionization of Molecular Hydrogen and Inelastic Scattering of Aligned H₂⁺ in Intense Femtosecond Laser Fields**
C J D Freeman, L J Frasinski, M J Stankiewicz
Physics Department, University of Reading, United Kingdom
- P-10 Three-Dimensional Orientation Scheme for Chiral Molecules Based on Phase-Locked Two-Color Laser Fields**
Norio Takemoto and Kaoru Yamanouchi
Department of Chemistry, School of Science, the University of Tokyo, and CINQIE, the University of Tokyo
- P-11 Radiation Pressure Acceleration of Ions: the Role of Laser Polarization**
Andrea Macchi,^{1,2} Tatiana V. Liseikina,² Domenico Prellino,² Fulvio Cornolti²
¹*polyLab, CNR -INFM, Pisa, Italy*
²*Department of Physics "E. Fermi", University of Pisa, Pisa, Italy*

- P-12 Coherent Optical Phonons in n- and p-type GaN**
Kunie Ishioka, Keiko Kato, Masahiro Kitajima, Naoki Ohashi, Hajime Haneda, Hrvoje Petek*
National Institute for Materials Science, Tsukuba, 305-0047 Japan,
**University of Pittsburgh, Pittsburgh, PA 15260, USA.*
- P-13 A novel technique for X-ray multi-spectral imaging of ultraintense laser generated plasmas**
L. Labate¹, A. Giulietti¹, D. Giulietti¹, P. Köster¹, T. Levato¹, L.A. Gizzi¹, F. Zamponi², A. Lübecke², T. Kämpfer², I. Uschmann², E. Förster²
¹ *Intense Laser Irradiation Laboratory - IPCF Consiglio Nazionale delle Ricerche, Pisa (Italy)*
² *Institut für Optik und Quantenelektronik - Friedrich-Schiller-Universität, Jena (Germany)*
- P-14 Linear and nonlinear incoherent Thomson Scattering for tunable femtosecond X sources**
Paolo Tomassini(1,2), Alberto Bacci(1), Sergio Betti (3), Andrea Gamucci (2), Antonio Giulietti(2), Danilo Giulietti(2,3,5), Leonida A. Gizzi (2) , Luca Labate(2), Luca Serafini(1), Vittoria Petrillo(1),
(1) *INFN Sect. of Milano*, (2) *IPCF – CNR, Pisa*, (3) *Dip. Fisica Univ. di Pisa*, (4) *Dip. Fisica Univ. di Milano*, (5) *INFN Sect. of Pisa*
- P-15 Complete temporal reconstruction of a high-harmonic attosecond pulse train using the FROG technique**
Chang Hee Nam, Kyung Taec Kim, Dong Hyuk Ko, Kyung Sik Kang, and Ju Yun Park
Dept. of Physics and Coherent X-ray Research Center, KAIST, Korea
- P-16 Attosecond pulse characterization using the quantum beat between the P_{3/2} and P_{1/2} states of alkali-metal atoms**
Ryuji Itakura
Kansai Photon Science Institute, Japan Atomic Energy Agency, Japan
- P-17 Influence of Strong Laser Pulses on the Amplitudes and Phases of Vibrational Wave Packets; Model Study of Decoherence**
Hiroyuki Katsuki^{1,2,3}, Haruka Gotoh^{1,2}, Jean-Christophe Delagnes^{1,3}, Hisashi Chiba^{1,3} and Kenji Ohmori^{1,2,3}
¹ *Institute for Molecular Science, Japan*, ² *SOKENDAI, The Graduate School for Advanced Studies, Japan*
³ *CREST, Japan Science and Technology Agency, Japan*
- P-18 Programmable Measurement of Short Pulses**
N. Forget, S. Coudreau and T. Oksenhendler
Fastlite, Bat 403, Ecole Polytechnique, 91128 Palaiseau, France
- P-19 A laser driven electron source for the production of radionuclides**
Andrea Gamucci¹, Marco Galimberti¹, Danilo Giulietti¹, Leonida A. Gizzi¹, Luca Labate¹, Gianluca Sarri¹, Paolo Tomassini¹, Antonio Giulietti¹, Nicolas Bourgeois², Jean Raphaël Marquès², Tiberio Ceccotti³, Sandrine Dobosz³, Pascal Monot³, Pascal D'Oliveira³, Horia Popescu³, Fabrice Réau³, Philippe Martin³, David Hamilton⁴, Jean Galy⁴
¹ *Intense Laser Irradiation Laboratory, IPCF, CNR Campus, Pisa, Italy & INFN, Sezione di Pisa, Italy*
² *LULI, CNRS UMR 7605, Ecole Polytechnique 91128 Palaiseau, France*
³ *CEA-DSM/DREC/SPAM Gif sur Yvette Cedex, France*
⁴ *Institute for Transuranium Elements, Karlsruhe, Germany*
- P-20 Time-dependent multiconfiguration theory for electronic dynamics in intense laser fields: a numerical orbital function description**
Tsuyoshi Kato, Kaoru Yamanouchi
Department of Chemistry, School of Science, The University of Tokyo, Japan
- P-21 Optics and beamline for XFEL/SPring-8 and the SCSS test accelerator**
Makina Yabashi¹, Atsushi Higashiya¹, Mitsuru Nagasono¹, Kenji Tamasaku¹, Hiroaki Kimura², Haruhiko Ohashi², Shunji Goto², and Tetsuya Ishikawa¹
¹ *RIKEN, XFEL Head Office, Kouto 1-1-1, Sayo, Hyogo 671-5148, Japan*
² *JASRI, XFEL Project Office, Kouto 1-1-1, Sayo, Hyogo 671-5198, Japan*
- P-22 State-selective excitation of alkali-metal atoms by the phase control in the strong laser field**
Keiichi Yokoyama, Akihiro Sugita, Yoshiaki Teranishi, Ryuji Itakura, Leo Matsuoka, Atsushi Yokoyama
Quantum Beam Science Directorate, Japan Atomic Energy Agency, Japan
- P-23 High Power Laser produced craters and meteorite impacts**
Tara Desai¹, Dimitri Batani¹, Marco Bussoli¹, Riccardo Dezulian¹, AnnaMaria Villa² and E.Krousky³
¹ *Dipartimento di Fisica “G. Occhialini”, Università Milano-Bicocca, Milano, Italy*
² *Dipartimento di Biotecnologie e Bioscienze, Università Milano-Bicocca, Milano, Italy*
³ *PALS Research Centre, 18221 Prague 8, Czech Republic*
